**Warning: This document is a Training Guide
for Financial Broker firms and should not be
provided to any potential investors.**

1. Summary of Key Features

- The 4 Year 100% Capital Secure Swiss Bond (the Bond) is a new Investment Solution designed for investors who wish to invest in a Structured Retail Product that offers **100% Capital Protection** and **attractive potential investment returns** linked to the performance of a stock market **Index**. The Bond is suitable as part of the process of constructing a genuinely diversified investment portfolio.
- Investors in the Bond will benefit from **100% Capital Protection at maturity**. The Capital Protection is provided by Goldman Sachs Group Inc (BBB+/A2/A).
- The **Underlying Investment** of the Bond is the **Swiss SMI Index** (SMI Index).
- Investors will receive a **20% Return if the Index is at or above its initial level** at the Final Valuation Date.
- Broker Solutions considers the Bond to have a **Summary Risk Indicator** of 2 on its risk scale.

- The Bond has a **4 year term**.
- The Bond will be **listed on the Luxembourg Stock Exchange**.
- **Daily liquidity** will be provided to investors that wish to sell the Bond prior to maturity under normal market conditions and at the discretion of Goldman Sachs International.
- The **Minimum Investment** in the Bond is **€20,000**.
- **Maximum Return:** 20%
- The **Closing Date for applications is 30 August 2024** (or earlier if fully subscribed).
- **Taxation:** Our understanding is that the potential returns will be subject to **Income Tax in the case of Personal Investors** and **Exempt from taxation in the case of Pension and Post Retirement Investors**.

Warning: All of the terms outlined in this document are indicative and subject to change. The final terms will not be known until 11 September 2024. Your Financial Broker will confirm the final terms in the Confirmation Certificate issued shortly after the Issue Date on 18 September 2024. If the terms of the Bond have changed significantly on 11 September 2024, your Financial Broker will contact you again requesting a new instruction to proceed with the investment.

Warning: Deductions for costs and charges are not made uniformly throughout the life of the product, but are loaded disproportionately onto the early period. If an investor sells the Bond prior to the end of the 4 year term, the practice of front-end loading will impact on the amount of money that the investor receives. The investor may not get back the full amount they invested or the Capital Protected amount if sold prior to maturity.

Disclaimer: This document has not been reviewed, approved or otherwise endorsed by Goldman Sachs or any of its affiliates and Goldman Sachs accepts no responsibility in relation to the accuracy, completeness or adequacy of the information included herein. Nothing in this document should be considered to be a representation or warranty by Goldman Sachs to any person, including without limitation, any potential investor and any member of the public, regarding whether investing in the Bond described herein is suitable or advisable for such person.

2. Description of the 4 Year 100% Capital Secure Swiss Bond 2

The investment rationale for investing in the Bond and in this Index can be summarised as follows:-

1. Capital Protection:

100% Capital Protection at Maturity.

2. Potential Jump Coupon of 20%:

20% Return if the Index is at or above its initial level at the Final Valuation Date.

3. Investing in Switzerland

4. Equities as a Long Term Investment and the Swiss SMI Index

Investing in Switzerland

- Switzerland has one of the highest levels of per capita GDP in the world. Its strong economic performance is largely driven by the services sector. The European Union is Switzerland's main trading partner.
- Switzerland is one of the top 10 economies by GDP per capita ranking (USD 92,000 in 2022).
- Approximately 74% of Swiss GDP is generated by the services sector and 25% by industry. The agricultural sector contributes less than 1%.
- The EU is Switzerland's main trading partner. Around 67% of Swiss imports are from the EU, while 50% of Swiss exports are to EU countries.
- The vast majority of Swiss businesses (over 99%) are SMEs employing fewer than 250 staff.
- Switzerland has maintained a low level of public debt relative to other countries even during the COVID-19 crisis. At the start of 2021, gross government debt (before deduction of financial assets) stood at approximately CHF 100 billion, representing 15% of GDP.
- Switzerland has one of the lowest rates of VAT in Europe. VAT at a rate of 8.1% is payable on most goods and services. A reduced rate of 3.8% is levied on accommodation services, while 2.6% applies to everyday items.
- Switzerland spends approximately CHF 23 billion on research and development (R&D) annually, which equates to around 3% of GDP. The private sector contributes over two thirds of this amount.
- The currency of Switzerland is the Swiss franc. The franc is divided into 100 centimes. The currency code for the Swiss franc is CHF.

A long term overweight exposure to Swiss Equities in a global portfolio has the potential to increase return and reduce risk. That is because of the high value creation nature of the Swiss equity market. Short term, the market trades at a slight discount to the similarly value creating US market, and so represents an alternative or adjunct for investors looking for value creation.

- recent interest rate cut by the Swiss National Bank is helpful to Swiss companies.
- The sectoral mix within the market has the potential benefit of enhanced exposure to the Healthcare sector

Swiss equities should be considered in any equity portfolio as a risk/return enhancing allocation, as well as a source of diversification over the medium to long term.

Equities as a Long Term Investment and the SMI Index

Although investing in equities (shares) involves a degree of investment risk and there will be volatile periods along the way, in the long term, equities tend to outperform other assets like bonds, property, cash etc. By adopting a medium term approach, equity investors can mitigate the risks and short term volatility associated with stock market investment while benefiting from the long term capital growth potential that stock markets can provide.

Stock Market Indices provide a broad representative portfolio of investments in multiple companies or shares. Indexes are often used as benchmarks to gauge the movement and performance of market segments or geographic regions. Investors generally use Indexes as a basis for diverse or passive investing. The Swiss SMI Index comprises the largest 20 company shares in Switzerland.

The blue-chip index SMI is the most important equity index in Switzerland and comprises the 20 largest stocks from the SPI. The SMI covers approximately 75% of the total capitalization of the Swiss equity market. It is free-float-adjusted, which means that only the tradable portion of the shares is considered in the index. A capping of the weights (quarterly to 18% in each case and ad-hoc if the limits are breached) ensures that no two components exceed a weighting of 20%. This makes the SMI fully compliant with the ESMA UCITS guidelines and it can be used as a benchmark index for the Swiss equity market in the European Union.

Because the SMI represents the Swiss equity market, it is used as an underlying index for many financial products such as options, futures, structured products and exchange traded funds.

Warning: Past Performance is not a reliable guide to future performance.

Product Back Testing

We back tested 8,111 4 year periods solely between 1 July 1988 and 1 July 2024. A summary of the back testing results are as follows:

Worst Return	0%
Best Return	+20%
Average Return	+15.18%
Number of times investors received back Negative returns	0 (0%) of all 4 year periods tested
Number of times investors received back 0% returns	1,955 (24.1%) of all 4 year periods tested
Number of times investors received Positive returns	6,156 (75.9%) of all 4 year periods tested

Source: Bloomberg, Goldman Sachs (July 2024)

Important Considerations

This back test data set includes numerous overlapping 4 year periods between 1 July 1988 and 1 July 2024.

The back testing of this product over all 8,111 4 year periods during the testing period illustrates no negative periods or negative outcomes where investors lost some or all of their capital. Investors should not consider this product back test illustration or previous product performance results as an indication of the potential for, or likelihood of positive outcomes or investment gains in the future. Past Performance and Product Back Test are not reliable guides to future performance which depends solely on future events.

Warning: Investors should not consider this product back test illustration or previous product results as an indication of the potential for, or likelihood of, positive outcomes or investment gains in the future.

Limited Usefulness of Past Performance and Back Testing

Past Performance and Back Testing are useful for information purposes only. The analysis of the past performance of any investment asset(s) or the back testing of any investment product is purely academic and has no bearing on, or provides limited benefit in the assessment of the future performance potential of the investment asset(s) or the investment product in question. The future performance of any investment asset(s) or investment product depends solely on future events and circumstances that cannot be known in advance and that are not necessarily informed by or influenced by what has happened in the past, more recently or otherwise.

Warning: Past Performance and Simulated Past Performance are not a reliable guide to future performance.

Warning: Product Back Testing is not a reliable guide to future performance.

Warning: This document is a Training Guide for Financial Broker firms and should not be provided to any potential investors.
