2. Description of the 4 Year 6.5% Annual Distribution Bond

The Bond is an innovative new Investment Solution designed for investors who wish to invest in a Structured Retail Product that offers an attractive Fixed Annual Return. The Bond is suitable as part of the process of constructing a genuinely diversified investment portfolio.

The Bond is in the form of a Note issued by Barclays Bank Ireland PLC, under the issuer's Note Programme as supplemented and/or amended by the Pricing Supplement. The Issuer's Base Prospectus dated 21 June 2024 and any supplements thereto, as completed by Final Terms (the Base Prospectus) provides the complete terms and conditions of the Notes. A copy of the Base Prospectus is available from your Financial Broker on request.

This Bond is in the form of a Note involving derivatives and is therefore a complex product. Investors should not invest in this Bond without having sufficient knowledge, experience and/or without having received professional advice from their Financial Broker to make a meaningful evaluation of the merits and risks of investing in a product of this type, and the information contained in this document and the Base Prospectus.

2.1 Investment Rationale

High Fixed Annual Return

A Fixed Return of 6.5% paid out at the end of each year, regardless to investment performance.

This Fixed Annual Return of 6.5% compares favourably with other sources of income including deposit rates, bond yields, property yields and other fixed income rates.

A Fixed Annual return of 6.5% is an attractive Income source for retired investors and other investors whose primary investment objective is income.

The Bond has a Medium risk score of SRI 4.

Equities as a long term investment

Although investing in equities involves a degree of investment risk and there will be volatile periods along the way, in the long term, equities tend to outperform other assets like bonds, property, cash etc. By adopting a medium term approach, equity investors can mitigate the risks and short term volatility associated with stock market investment while benefiting from the long term capital growth potential that stock markets can provide.

Stock Market Indices provide a broad representative portfolio of investments in multiple companies or shares. Indexes are often used as benchmarks to gauge the movement and performance of market segments (Eurozone banks in this case) or geographic regions. Investors generally use indexes as a basis for diverse or passive investing. The EuroStoxx Banks Index is an Index of Eurozone bank shares.

EuroStoxx Banks Index

The EuroStoxx Banks Index is an Index of the 50 largest bank stocks in the Eurozone.

The Stoxx Supersector Indices track supersectors of the relevant benchmark index. There are 20 supersectors according to the Industry Classification Benchmark (ICB) and companies are categorised according to their primary source of revenue. One of the supersectors identified by Stoxx is Banks.

2.6 Summary Risk Indicator

The Summary Risk Indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because Barclays Bank Ireland PLC is not able to pay the Investor. The risk indicator assumes the product is held until maturity.

We have classified this product as 4 out of 7, which is a medium risk class:

The actual risk can vary significantly if the Investor encashes prior to maturity. Investors may not be able to sell this product easily or may have to sell at a price that significantly impacts on how much the Investor gets back.

The Summary Risk Indicator of 4 rates the potential losses from future performance at a medium to high level and poor market conditions are unlikely to impact Barclays Bank Ireland's capacity to pay you.

Investors will receive payments in the product's currency, which may be different from Investor's domestic currency. In this case, be aware of currency risk. The final return Investors will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If Barclays Bank Ireland PLC is not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks please refer to the Key Information Document (KID) and the risk sections of the Base Prospectus as specified in the section 'Other relevant information' below.

Warning: If you invest in this Bond you may lose some or all of the money you invest.

Warning: The value of your investment can go down as well as up.

2.7 Liquidity

The underlying Notes of the Bond will be listed on the Luxembourg Stock Exchange and are tradable investments (subject to the Warnings below).

Barclays Bank Ireland PLC endeavours to make a secondary market in the Notes, subject to it being satisfied that normal market conditions prevail. Barclays Bank Ireland PLC may determine a bid and offer price in a different manner than other market participants and prices can vary. Sometimes this variance may be substantial. Barclays Bank Ireland PLC may be the only market maker in the Notes which may affect liquidity.

Therefore, investors will, in normal market conditions be able to sell the Notes at any time during the term. The price at which the Notes can be sold will be the open market value determined by Barclays Bank Ireland PLC which will take fees and charges into account and can be lower than the initial amount invested.

Warning: Barclays Bank Ireland PLC may determine a bid and offer price in a different manner than other market participants and prices can vary. Sometimes this variance may be substantial. Barclays Bank Ireland PLC may be the only market maker in the Notes which may affect liquidity.

Warning: No representation is made as to the existence of a market for the underlying Notes. Barclays Bank Ireland PLC will endeavour to make a secondary market in the Notes, subject to the bank being satisfied that normal market conditions prevail. Any prices indicated will be dependent upon factors affecting or likely to affect the value of the notes such as, but not limited to, the remaining time to the Maturity Date, the outstanding principal amount, the Issuer's or, if applicable, the Guarantor's credit risk, the performance and volatility of the underlying asset, interest rates, exchange rates, credit spreads, and any incidental costs etc.

Warning: Deductions for costs and charges are not made uniformly throughout the life of the Bond, but are loaded disproportionately onto the early period. If an investor sells the Bond prior to the end of the 4 year term, the practice of front-end loading will impact on the amount of money that the investor receives. The investor may not get back the full amount they invested.

2.9 What happens if I die before the Bond Matures?

In the event of death of a sole investor or a surviving joint investor, the Bond may be held by the administrators of the estate until maturity. Alternatively, the Bond may be sold prior to maturity, subject to normal probate regulations, at its realisable value which may be lower than the original amount invested. The proceeds from the sale of the Bond as a result of death will be paid to your Omnium or Conexim Account or in the case of an insured pension or post retirement investor, to the investing life company.

Warning: Deductions for costs and charges are not made uniformly throughout the life of the Bond, but are loaded disproportionately onto the early period. If an investor sells the Bond prior to the end of the 4 year term as a result of death, the practice of front-end loading will impact on the amount of money that the investor receives back. The investor may not get back the full amount they invested.

In circumstances where a restructuring of the Bond is required, Broker Solutions will inform your Financial Broker immediately and will work with the product issuer and guarantor to restructure the product in a manner that is in the best interests of investors.
