This process is repeated every 6 months thereafter until the return condition is met (the Index is at or above 90% of its initial level) or until Maturity.

INVESTMENT RATIONALE:

Equities as a long term investment: Although investing in equities involves a degree of investment risk and there will be volatile periods along the way, in the long term, equities tend to outperform other assets like bonds, property, cash etc. By adopting a medium term approach, equity investors can mitigate the risks and short term volatility associated with stock market investment while benefiting from the long term capital growth potential that stock markets can provide.

Stock Market Indices provide a broad representative portfolio of investments in multiple companies or shares. Indexes are often used as benchmarks to gauge the movement and performance of market segments or geographic regions . Investors generally use indexes as a basis for diverse or passive investing. The EuroStoxx Banks Index is a an Index of Eurozone Bank shares.

SUMMARY RISK INDICATOR:

The Summary Risk Indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because Barclays Bank Ireland PLC is not able to pay the Investor. The risk indicator assumes the product is held until maturity. The actual risk can vary significantly if the Investor encashes prior to maturity.
