INVESTMENT RATIONALE:

Property as a long term investment: Although investing in Real Estate or Property involves a degree of illiquidity and investment risk and there will be volatile periods along the way, in the long term, Property tends to perform favourably relative to other assets like bonds and cash etc. By adopting a medium term approach, Property investors can mitigate the risks and short term volatility associated with Property investment while benefiting from the long term capital growth potential or investment income that Property investments can provide.

Property also increases the diversification of well structured portfolios invested in other asset classes such as cash, equities, bonds etc.

Indices provide a broad representative portfolio of investments in multiple companies or shares. Indexes are often used as benchmarks to gauge the movement and performance of market segments or geographic regions. Investors generally use indexes as a basis for diverse or passive investing.

The EuroStoxx Real Estate Index (<https://stoxx.com/index/sx86e/>) is a Benchmark Index of Eurozone Property shares.

SUMMARY RISK INDICATOR:

The Summary Risk Indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because BNP Paribas is not able to pay the Investor. The risk indicator assumes the product is held until maturity. The actual risk can vary significantly if the Investor encashes prior to maturity.

We have classified this product as a 4 out of 7 as follows:

Warning: This document is intended for Financial Broker firms only and is not suitable for potential Investors. This document should be read in conjunction with the product Brochure where a full list of warnings is provided.
